Pictures from the welding course at Niterói

## New courses – new opportunities

We are glad to announce that our new course finally has started. Due to the demands from DLW sponsors, we started a welding course in Niterói in July. 12 candidates were selected, after passing the test, and they are in these days about to finish their education. We are in dialog with some companies for getting them employed, but if you are in need of trainee welders, please let us know.

The second course requested were the Industrial Safety Technician. This course also started in July, lasts for a period of one and a half year, and has 40 students in educational activities in Caxias.

All of our students were selected in conjunction with various NGO`s in Rio de Janeiro and Niterói.

As mentioned every candidate needs to pass a test before entering our educational programs, to show that they are fitted and competent for doing the course that they are about to entering. After being selected for the courses, DLW offer our students follow-up service at the schools. We visit the schools once a week to support, motivate and help the students, but also for maintaining a close cooperation with the staff and the teachers at the schools.

A view of the courses Dream Learn Work is offering this year.

The Course	Starting up	Ending	Students	Location
Welding	July	September 2011	12	Niterói
QHSE Technician	July	December 2012	40	Caxias
Automation	September	July 2013	2	Benfica
Administration	October	April 2012	2	To be decided
Welding	December	February 2012	12	Maracanã

We are starting planning courses for next year, and would like to take the opportunity to remind you that we are interested in knowing your need to labor, and that we are hoping for renewable trust.

## Diego and Ana Carolina at Pre-Vestibular

As mentioned in our first newsletter, two of our former students are studying at the pre-vestibular this year, to accomplish their dream. Both Diego and Ana Carolina frequented the oil and gas course DLW offered last year, and in November the two of them will compete in university places in the area of siv.ing Petroleum and Gas. In august DLW had a meeting with them, and both of them were truly gratefull for the opportunity they have been given. DLW on the other side are very proud of the effort that they are showing to obtain their goal. We wish them good luck with the test.

## Visit from Statoil

In August we had the pleasure of having a visit from Statoil, one of our largest sponsors. Wanted to meet some of the students, talk with them and see where they came from. They made interviews with the students, staff for Instituto Bola Pra Frente, and DLW. Everything is on tape, and the film will be present at our web-site and on Facebook, when it will be released from the company in October.

DLW wish to encourage all our sponsors to come and meet the students in their environment. It really means a lot and it's very motivating for the students when a supporter is visiting them, taking some pictures, talking to them and show interest in their progress. And for you as a sponsor it's a good opportunity to get to know the students, and to follow up your support. And also by publishing some documentation, it's easy for you to show your employees, customers, suppliers and other associates your contribution to the social responsibility.

## Coming up next newsletter:

Meet our new welders
